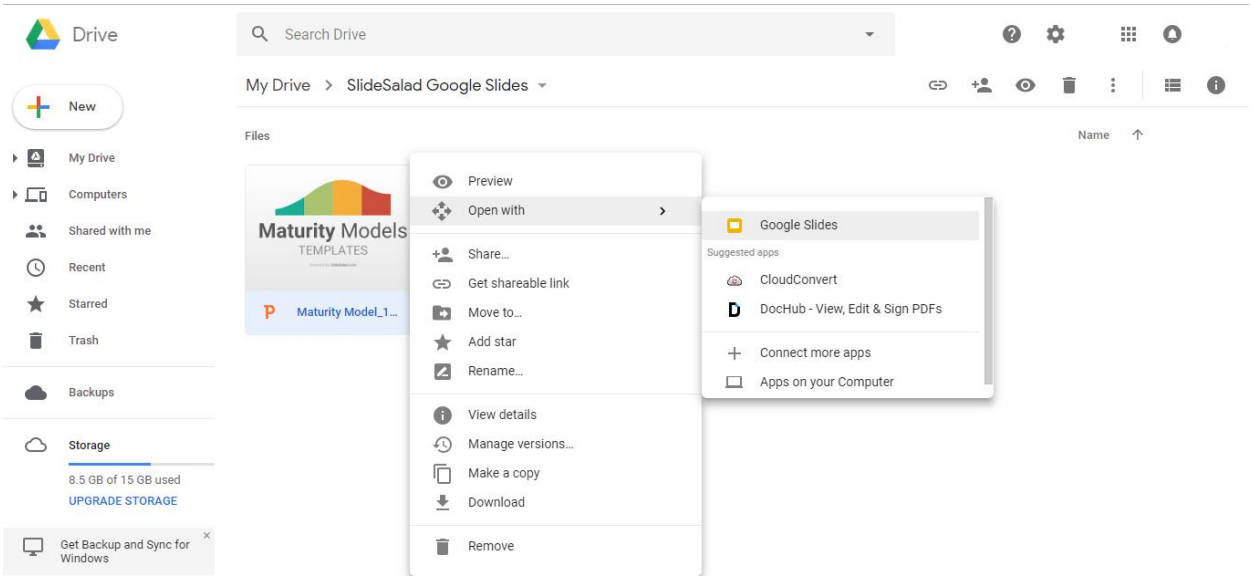
How To Use Google Slides Templates?

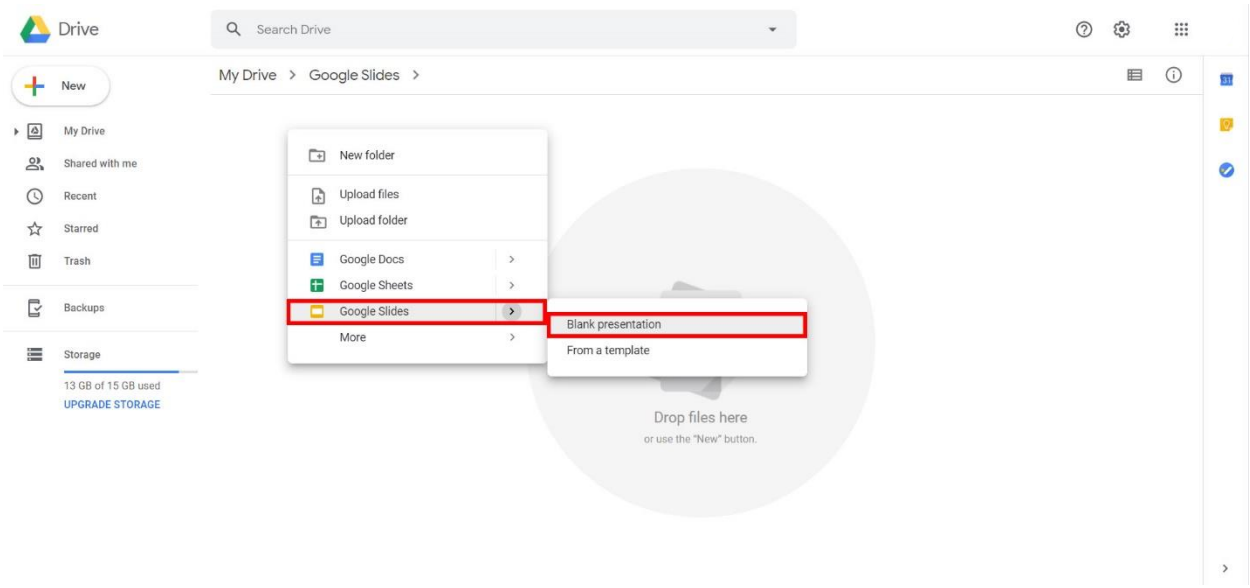
- Unzip the file you downloaded
- Go to your Google Drive.
- Upload a presentation pptx. files to your Google Drive.
  by drag and drop files or click on the “New" button at the top left corner -> File Upload
- Right-click the file you uploaded (Recommend to work on the 16:9 version).
- Select Open with and choose Google Slides.
- A copy of your original file in Google Slides format will be created. You can then edit it in your browser like any other Slides presentation.



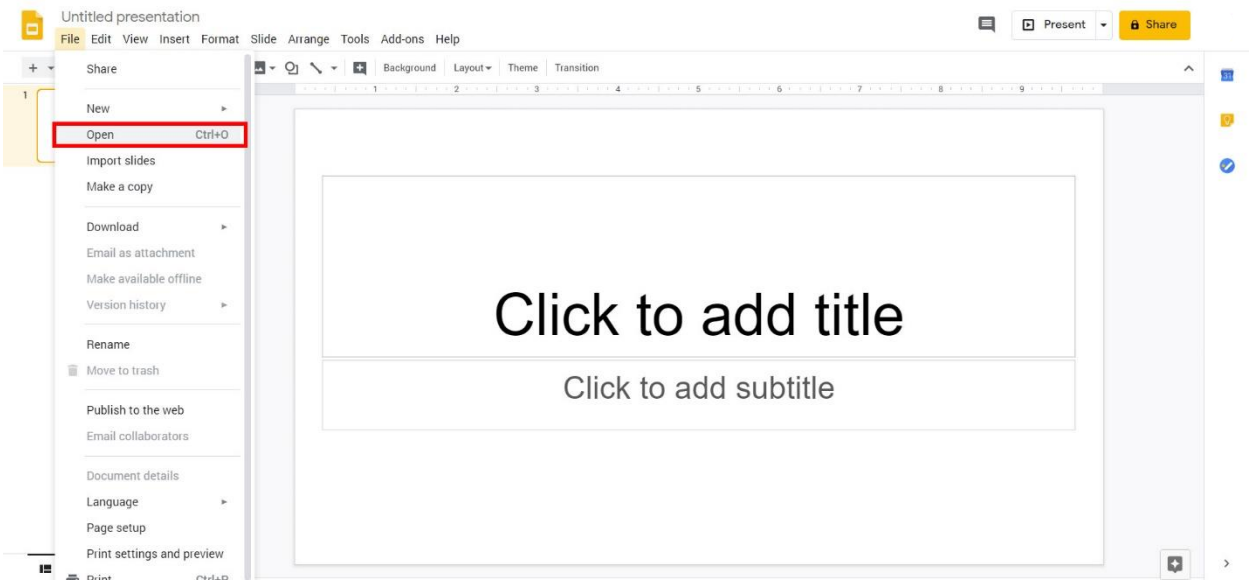
How to fix Google Slides Issue "File could not open. Try refreshing the page"?

- Go to your Google Drive.
- Right-click on an empty area and then —> click on " Google Slides" —-> Then “Blank Presenation“

- New Blank Presentation will open

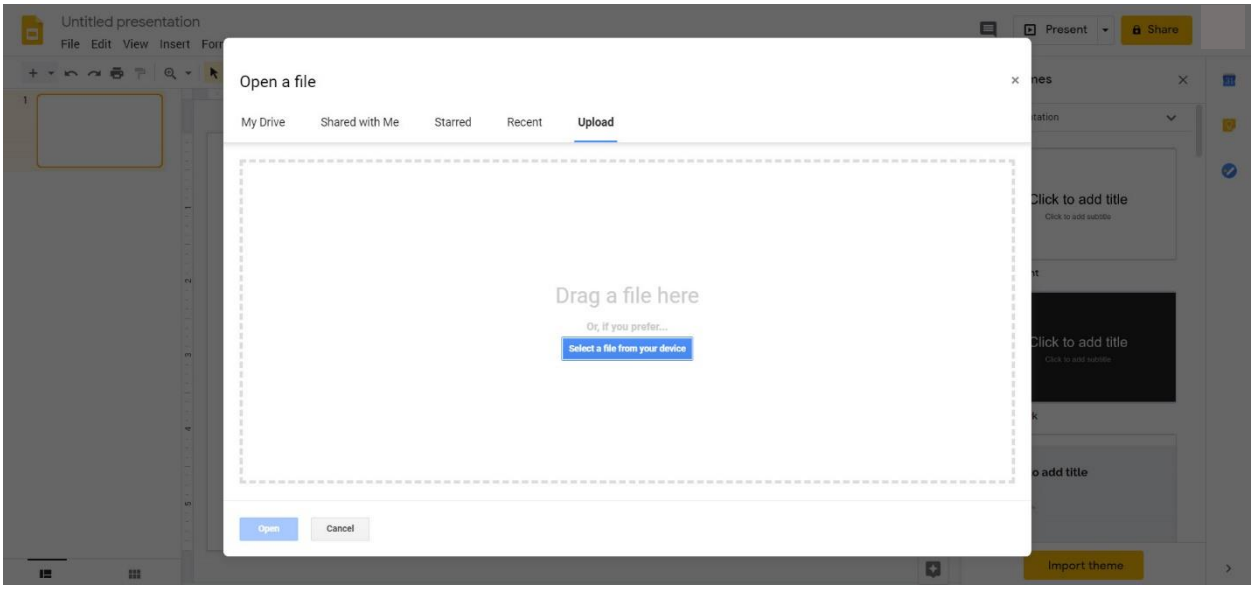


From the top menu click on " File"—> Then "Open"



- Upload a presentation pptx. file (The File You downloaded) to your Google Drive by drag and drop files or click on the "Select a File From Your Device" button.

- Wait until the template file is uploaded completely.
- Then Your File will convert to Google Slides directly.



How to install Theme Colors and add them to Google Slides?

1. Open your presentation in Google Slides.

2. At the top, click Slide>Change theme.

3. In the bottom right, click Import theme.

4. Click upload and in your downloaded package open (Theme Colors) Select Theme you want to use and drag and drop it to Google slides

5. Select the color you uploaded and click import theme
